WEIMAR COLLECTION

An Illustrated Print Series

DUOTONE PROJECTORA is an illustrated print series that transforms the character of a place into a distinct graphical language.

Architecture, landmarks, and everyday spaces are translated into simplified forms, strong compositions, and carefully considered colors.

Each collection focuses on a different city or place, resulting in a growing body of work that can take shape across a range of printed formats.

FROM PLACE TO PRINT

A familiar facade. A winding path. A monument passed a hundred times.

Weimar is full of places that invite a second look. This first collection brings twelve of them together, each with its own character, color, and perspective.
